

You be the Automobile Designer

The job duties of an automobile designer include drafting layouts of automobile components, including fenders, the hood, the lamps, console, doors, mirrors, and more, the assemblies and systems using prototypes, models, and dozens of sketches.

1954 LINCOLN CAPRIS CONVERTIBLE

Challenge: Look around your neighborhood at all the different styles and shapes of the cars. Think of the parts you like best and things you would change. You be the automobile designer and design your perfect car. Draw it from a front view, a side view and a back view. How would the doors open? Would it have small windows? If you have supplies around your home, create a 3-D prototype. Think about all the different cars at the Virginia Museum of Transportation for ideas as well. Send us a picture of your automobile design. We would love to see it!
